9. Read the passage and answer the question:

A robot is a special kind of machine which can move and follow instructions. These instructions are sent from a computer for the robot to perform. The main advantage of having a robot is that it doesn't make any errors and it never gets tired. Robots do not complaint unless they are asked to do so. Robots are used to ease off the effort put in by humans. For example, robots can help us in making cars and some robots are used to explore dangerous places where a human cannot intervene. They use robots to explore volcanoes and even in the cleaning of the house. Homer a poet, over 2,000 years ago imagined a life with a robot which he imagined to be made of gold. The first robot was created in the year 1961 which was called Unimate, used in the making of cars with giant arms. These days, robots can understand words and help to be an assistant. Robots can also help in fighting wars and to even discover things of a different planet.

What is the main purpose of this paragraph?

- a) to show how easy it is to make a robot
- b) to tell what a robot is
- c) to describe the things a robot can do
- d) to explain the difference between a robot and a machine

**Correct Answer: c**
